Invisible Threats: Master Windows AV Evasion! 🚀

HackForest Cybersecurity Academy

Break Through Defenses with Elite Skills!

Tired of payloads being flagged? Join HackForests cutting-edge training to master advanced Windows AV and EDR evasion. Learn sophisticated techniques through hands-on labs and real-world scenarios. HackForest guarantees 100% success in bypassing modern AV and EDR solutions!

❓ Why Choose HackForest?

In a rapidly evolving threat landscape, ethical evasion skills are critical for elite pentesters and red teamers. Our course delivers:

- ✔ **Core Insights**: Master Windows and AV internals.
- ✔ **Practical Labs**: Tackle real-world challenges.
- ✔ **Lasting Expertise**: Learn scalable, adaptable techniques.
- ✔ **Exclusive Methods**: Beyond this syllabus, explore private techniques not shared publicly!

◎ Who Should Join?

Perfect for:

- ❯ Penetration Testers
- ❯ Red Team Operators
- ❯ Security Researchers
- ❯ Cybersecurity Pros advancing offensive skills

Prerequisites: Knowledge of Windows OS, scripting (Python, PowerShell, C/C++), and basic attack vectors.

🛠 What Youll Conquer

- `</>` **AV & EDR Architecture**: Decode signature, heuristic, behavioral detection; explore AMSI and ETW.
- `</>` **Obfuscation Mastery**: Encryption, polymorphism, API, and control flow obfuscation.
- `</>` **Memory Tactics**: Process injection, reflective DLLs, direct/indirect syscalls.
- `</>` **Detection Evasion**: Bypass AMSI, tamper with ETW, evade sandboxes.
- `</>` **Payload Strategies**: Staged/stageless, LOLBins, fileless malware.
- `</>` **Custom Tools**: Build loaders, packers, and modify offensive tools.
- `</>` **Ethical Use**: Apply skills responsibly; learn blue team countermeasures.
- `</>` **Private Techniques**: Exclusive, advanced methods reserved for our students.
